

Safety Considerations

Avoid entanglement with hands, long hair, loose clothing, apron strings and trimming tools.

This product has been designed from day one with your safety in mind. All corners are rounded, the rods slip out, and the complete unit can pull away from the potters wheel. With thousands in use, we know of no injuries from using a Giffin Grip, but keep in mind that some risk is inevitable in practically everything we do. Be especially careful with children in the studio, their imaginations are frequently better than ours.

Trade Secrets

To keep pots from warping as they dry, place on level shelves, away from direct sun and breezes. Turn pots upside down as soon as possible. Protect delicate rims with thin foam or clay pads. Small pots can be lifted up. Giant pots can be held from the inside out. If lubrication is needed, use a vinyl cleaner such as Armorall.® Dry pots can be held more firmly than wet pots. Keep your trimming tools sharp to avoid chatter. There are no "rules" for using the Giffin Grip. Do whatever works for you within the limits of safety.

Parts included

Description	Part #	Replacement price
		Set of 3
Basic Sliders (set of 3)	BS3	\$14.95
